-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 March 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 5-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 5-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 March 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 6.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

Art Unit: 2635

DETAILED ACTION

The application of Ruediger Bart et al. for Mobile Transponder For a Motor Vehicle filed 3/20/2001 examined. Claims 5-7 are pending.

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al. U.S. Patent 4673921 in view of Gunnarsson International Publication WO 98/23971.

Regarding claim 5, Saito et al. teaches a mobile transponder (figure 1A) for a vehicle with an optical indicator (col. 3 lines 35-36), the mobile transponder comprises: evaluation logic (21) for providing output information concerning direction and location of the vehicle (col. 3 lines 30-35) and a display for displaying information concerning the location of the vehicle (col. 4 lines 44-55). Saito et al. teaches an antenna (17) or recognizing the signal from the vehicle (col. 3 line 35) but is however silent on teaching a plurality of antennas having three-

Art Unit: 2635

dimensional directional characteristics for recognizing a signal from the vehicle. Gunnarsson in an art related Omidirectional Transponder invention teaches a transponder having a plurality of patch antennas (page 2 lines 32-34) and the antennas exhibiting three-dimensional (omidirectional) characteristics (page 6 lines 31-38) in order to transmit and receive information in all directions.

It would have been obvious to one of ordinary skill in the art to have a plurality of antennas having three-dimensional directional characteristics for recognizing a signal from the vehicle in Saito et al. as evidenced by Gunnarsson because Saito et al. suggests an antenna recognizing the signal from the vehicle and Gunnarsson teaches a transponder having a plurality of antennas and the antennas exhibiting three-dimensional (omidirectional) characteristics in order to transmit and receive information in all directions.

Claim 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al. U.S. Patent 4673921 in view of Gunnarsson International Publication WO 98/23971 and further in view of Culpepper et al. U.S. 5657026.

Regarding claims 6-7, Saito et al. in view of Gunnarsson teaches providing location information (U.S. Patent 4673921, col. 3 lines 33-36) but is silent on teaching providing an indication of the distance of the vehicle from the mobile transponder. Culpepper et al. in an art related Beacon Signal Receiving System teaches providing an indication of the distance of the vehicle from the mobile transponder (col. 3 lines 24-30) in order to provide additional location information to the user.

It would have been obvious to one of ordinary skill in the art to provide an indication of the distance of the vehicle from the mobile transponder in Saito et al. in view of Gunnarsson as

Art Unit: 2635

evidenced by Culpepper et al. because Saito et al. in view of Gunnarsson suggests providing location information and Culpepper et al. teaches providing an indication of the distance of the vehicle from the mobile transponder in order to provide additional location information to the user.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vernal U Brown whose telephone number is 703-305-3864. The examiner can normally be reached on M-Th, 8:30 AM-6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 703-305-4704. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-6743 for regular communications and 703-308-6743 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
